

API JobGroups Get Status v4

This is the latest version of the APIs.

Contents:

- *Required Permissions*
- *Request*
- *Response*
- *Reference*

Get current status of the specified jobGroup. For more information on jobGroups, see *API JobGroups Get v4*.

Version: v4

Required Permissions

NOTE: Each request to the Trifacta® platform must include authentication credentials. See *API Authentication*.

Request

Request Type: GET

Endpoint:

```
/v4/jobGroups/<id>/status
```

where:

Parameter	Description
<id>	Internal identifier for the job group

Request URI - Example:

```
/v4/jobGroups/2/status
```

Request URI - Example for status across all jobs:

If you need to check the status of all jobs, you can use the following endpoint, querying for status values of `Failed`:

```
/v4/jobGroups/?status=Failed
```

Request Body:

Empty.

Response Body:

Returned response is the jobGroup definition for all accessible jobGroups where `status=Failed`. See *API JobGroups Get v4*.

Response

Response Status Code - Success: 200 - OK

Response Body Example:

```
"Complete"
```

Reference

For more information on the available status messages, see *API JobGroups Get v4*.
