The following direct and indirect dependencies apply to the Trifacta software that is installed on the edge node for each supported version of the operating system.

NOTE: When dependencies are acquired for versions of Ubuntu, the operating system grabs the latest version, even if it is later than the version on which the software is dependent. In some cases, this mismatch can result in installation errors, which can be fixed by manually installing the dependency with the correct version.

Direct Dependencies

These direct dependencies are packaged with the Trifacta® installer.
