To centralize common enablement configuration on a per-workspace basis, a number of configuration properties are being migrated from

`trifacta-conf.json`

into the Trifacta® application.

- In prior releases, some of these settings may have been surfaced in the Admin Settings page. See *Admin Settings Page*.
- For more information on configuration in general, see *Platform Configuration Methods*.

To assist administrators in managing these settings, these section provides a per-release set of updates and a map of old properties to new settings.

- These settings now appear in the Workspace Admin page. To access, from the left menu bar select **User menu > Admin console > Workspace admin**.
- For more information, see *Workspace Admin Page*.
