

# API AccessTokens Get v4

 This is the latest version of the APIs.

## Contents:

- *Required Permissions*
- *Request*
- *Response*
- *Reference*

Get information on the specified AccessToken.

- **Access tokens** can be used for managing more secure access to the APIs. For more information, see *API Authentication*.
- Access tokens can be created via the Trifacta® application or via API. For more information on creating via API, see *API AccessTokens Create v4*.

**Version:** v4

## Required Permissions

 **NOTE:** Each request to the Trifacta® platform must include authentication credentials. See *API Authentication*.

## Request

**Request Type:** GET

## Endpoint:

```
/v4/apiAccessTokens/<id>
```

where:

Parameter	Description
<id>	The tokenId value for the access token

## Request URI - Example:

```
/v4/apiAccessTokens/0bc1d49f-5475-4c62-a0ba-6ad269389ada
```

## Request Body:

Empty.

## Response

**Response Status Code - Success:** 200 - OK

 **NOTE:** If you receive a `Route doesn't exist` error message, please verify that the API access token feature has been enabled in your instance of the platform. For more information, see [Enable API Access Tokens](#).

## Response Body Example:

```
{
  "tokenId": "0bc1d49f-5475-4c62-a0ba-6ad269389ada",
  "description": "new token",
  "expiredAt": "2020-01-15T20:58:28.175Z",
  "lastUsed": null,
  "createdAt": "2019-01-15T20:58:28.175Z"
}
```

## Reference

Property	Description
tokenId	Internal identifier for the token.  <b>NOTE:</b> This value is unique within the instance of the platform.
description	User-friendly description for the access token
expiredAt	Timestamp for when the access token expires. A <code>null</code> value indicates that the access token never expires.
lastUsed	Timestamp for when the access token was last used. A <code>null</code> value indicates that the access token has never been used.
createdAt	Timestamp for when the access token was created
