

API - UI Integrations

You can automate execution of tasks against the Trifacta platform by referencing URL destinations through your Chrome browser.

Pre-requisites:

- If the user has not authenticated with the Trifacta platform, the user is redirected to the Login page, where s/he can login before completing the UI integration.
- The integration must be executed through Google Chrome.

How to:

To execute a UI integration, login to the platform and execute the following:

```
[http|https]://<host>:<port>/<UI endpoint>
```

where:

- `http` or `https` is the appropriate protocol identifier, depending on whether you have enabled SSL connections
- `<host>` is the Trifacta platform.
- `<port>` is the port number to connect to the Trifacta platform. Default value is 3005.
- `<UI endpoint>` is the URI to use, as specified for the UI endpoint.
