

API People Create v4

This is the latest version of the APIs.

Contents:

- *Required Permissions*
 - *Request*
 - *Response*
 - *Reference*
-

Create a new user.

Version: v4

Required Permissions

The authenticated user must be an admin.

NOTE: Each request to the Trifacta® platform must include authentication credentials. See *API Authentication*.

Request

Request Type: POST

Endpoint:

```
/v4/people/
```

Request Body:

The following properties are the minimum required to create a user:

```
{
  "accept": "accept",
  "password": "foo",
  "password2": "foo",
  "email": "abc2234@example.com",
  "name": "abc2"
}
```

The following request includes all configurable parameters:

```
{
  "accept": "accept",
  "password": "foo",
  "password2": "foo",
  "email": "abc2234@example.com",
  "name": "abc2",
  "isAdmin": false,
  "ssoPrincipal": null,
  "hadoopPrincipal": null,
  "lastLoginTime": null,
  "awsConfig": null
}
```

Response

Response Status Code - Success: 201 - Created

Response Body Example:

```
{
  "isDisabled": false,
  "forcePasswordChange": false,
  "state": "active",
  "id": 9,
  "email": "test@example.com",
  "name": "Test1",
  "ssoPrincipal": null,
  "hadoopPrincipal": null,
  "isAdmin": false,
  "updatedAt": "2019-01-09T20:23:31.560Z",
  "createdAt": "2019-01-09T20:23:31.560Z",
  "outputHomeDir": "/trifacta/queryResults/test@example.com",
  "lastStateChange": null,
  "fileUploadPath": "/trifacta/uploads",
  "awsConfig": null
}
```

Reference

Request properties:

Property	Description
accept	This property must be set to <code>accept</code> to create the user.
password2	This value confirms the value for <code>password</code> . These two property values must be identical.

For more information on the properties of a user, see *API People Get v4*.
