

Search Panel

When you choose to add a new step to your recipe, the Search panel opens in the context panel. Enter text or browse the available transformations to begin building your next step.

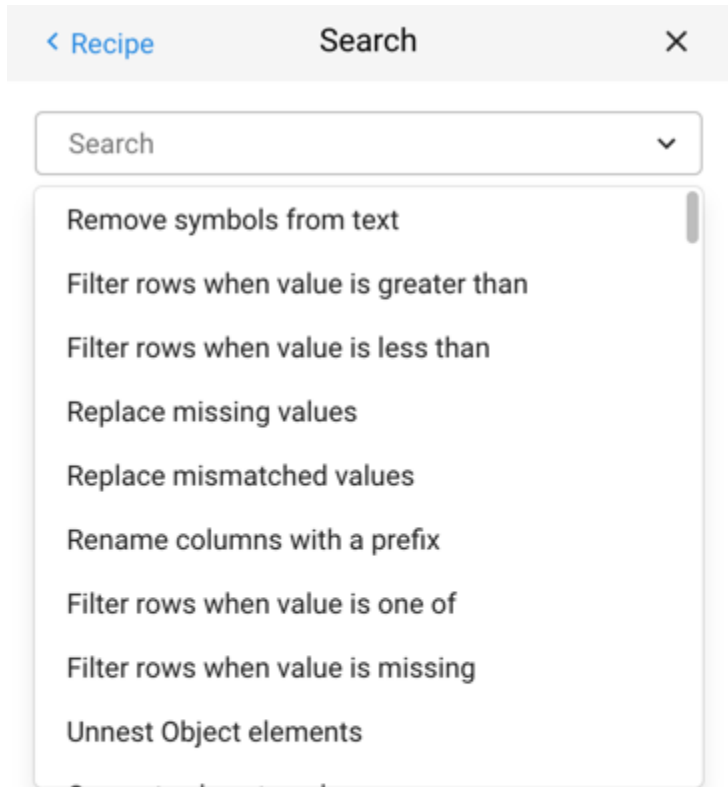

Figure: Search Panel

The available transformations cover many basic and advanced steps based on a transform, function, or higher-level transformation.

Tip: If you are familiar with Wrangle transforms, you can enter the transform name in the search bar. For example, type `window`.

After you have selected the transformation to build, the Transform Builder is pre-populated with some configuration done for you, so you can begin specifying the transformation.

For more information, see *Transform Builder*.
