

# API WrangledDatasets Put PrimaryInputDataset v3

As of Release 6.4, the v3 APIs are End of Life (EOL). Before using this release or a later one, you should migrate to using the latest available API version. For more information, see *API Version Support Matrix*. Latest version of this endpoint: *API WrangledDatasets Put PrimaryInputDataset v4*.

Updated the primary input dataset for the specified wrangled dataset. Each wrangled dataset must have one and only one primary input dataset, which can be an imported or wrangled dataset.

**Tip:** In the Trifacta application UI, the `WrangledDataset` object is called a `recipe`.

This action performs a dataset swap for the source of a wrangled dataset, which can be done through the UI. See *Flow View Page*.

**Tip:** After you have created a job via API, you can use this API to swap out the source data for the job's dataset. In this manner, you can rapidly re-execute a pre-existing job using fresh data. See *API JobGroups Create v3*.

**Version:** v3

## Required Permissions

**NOTE:** Each request to the Trifacta® platform must include authentication credentials. See *API Authentication*.
