

# WASB Browser

In the Trifacta® application, the WASB browser enables you to browse, specify, and filter the files to which you have access in the HDInsight cluster to which the Trifacta platform is connected.

The WASB browser appears when you choose to import a dataset from WASB. See *Import Data Page*.

**NOTE:** Interactions with WASB are determined by user permissions and features enabled in the Trifacta platform. For more information, see *Using WASB*.

**NOTE:** Avoid using the Back button on your browser, which exits the WASB browser without applying changes to your configuration.

In the WASB browser, you can specify an explicit path to resources. Click the Pencil icon, paste the path value, and click **Go**.

**Filter Files:**

To display a subset of files, enter a string in the Search box. The filter is applied as you type and matches anywhere in the name of a currently displayed file or folder.
