

Create Role Dialog

To create a new role that you can assign to workspace users, click **Create role** in the Workspace Roles page.

The screenshot shows a 'Create role' dialog box. At the top, there is a title bar with the text 'Create role' and a close button (X). Below the title bar, there is a 'Name' field containing the text 'viewer_flows'. Underneath the name field is a 'Privileges' section. This section contains three rows, each with an icon and a dropdown menu: 'Flows' with a 'Viewer' dropdown, 'Connections' with a 'None' dropdown, and 'Plans' with a 'None' dropdown. At the bottom right of the dialog, there are two buttons: 'Cancel' and 'Save'.

Figure: Create Role Dialog

In this dialog, you assign one or more privileges to the defined role.

Name: Enter a name for your role. This name must be unique within the roles in the current workspace.

Privileges:

Tip: You can create a role with no privileges, which may be useful for disabling access to workspace objects without disabling the account itself.

- **Flows:** These privileges govern the actions that users can perform on flows in the workspace.
- **Connections:** These privileges govern the actions that users can perform on connections in the workspace.
- **Plans:** These privileges govern the actions that users can perform on plans in the workspace.
- For more information, see *Privileges and Roles Reference*.

To finish creating your role, click **Save**.

This role is now available for assigning to users through the Workspace Roles page. See *Workspace Roles Page*.
