

Databricks Tables Browser

Use this browser to read sources stored as the Databricks database tables and views or select or create tables to which to publish job results.

- Your Trifacta® deployment must be installed on Azure and connected to an instance of Databricks Tables.

NOTE: Each user must have a Databricks Personal Access Token installed in their account. For more information, see *Databricks Personal Access Token Page*.

- The Databricks Tables browser appears when you select the Databricks Tables tab to import a dataset. See *Import Data Page*.
- When specifying a job, you can choose to write a publishing action to Databricks Tables. See *Run Job Page*.
- For more information on interacting with Databricks Tables, see *Using Databricks Tables*.

Browse Databricks Tables

Use the links and icons to browse for Databricks databases and tables.

NOTE: Row information is not available for Databricks tables.

NOTE: Azure Databricks does not publish the last modified date for its resources. This information is not available to the Trifacta platform.

NOTE: Avoid using the Back button on your browser, which exits the browser without applying changes to your configuration.

Identifier	Type	Description
	Database	Click these links to open a Databricks database to reveal its tables.
	Table	<p>Click the Plus icon to select this Databricks table as your source.</p> <p>To preview its data, hover over the name of the table, and then click the Eye icon.</p> <div style="border: 1px solid green; padding: 5px; margin: 10px 0;"> <p>Tip: Sizes are calculated and displayed next to tables. They are not displayed next to databases.</p> </div> <div style="border: 1px solid gray; padding: 5px; margin: 10px 0;"> <p>NOTE: Timestamp information is not available from Databricks.</p> </div>
	View	<p>Click the Plus icon to select this view as your source.</p> <p>To preview its data, hover over the view name and then click the Eye icon.</p> <div style="border: 1px solid gray; padding: 5px; margin: 10px 0;"> <p>NOTE: Previewing complex views may impact performance.</p> </div>
	Page navigation	<p>Use these links to navigate between pages of databases and tables.</p> <div style="border: 1px solid gray; padding: 5px; margin: 10px 0;"> <p>NOTE: In some cases, subsequent pages of tables may be blank, and counts of tables may not match displayed figures. This is a known issue.</p> </div>
Databricks /default	Breadcrumb	Click the links in the breadcrumb trail to navigate.

Search List

To filter the list of databases or tables, enter a string in the Search box. The filter is applied as you type and matches anywhere in the name of a currently displayed database or table name.

Create Dataset with SQL

Creation of datasets with SQL is not supported for Databricks Tables connections.
