

Share Flow Dialog

You can manage access to a flow for other users through the Share Flow dialog. In Flow View, select **Flow menu** > **Share Flow....**

Tip: If groups have been enabled in your instance of the Trifacta platform, you can share flows and connections to LDAP groups. For more information, see *Configure Users and Groups*.

Tip: A workspace administrator has owner-level access to flows in the workspace. For more information, see *Workspace Admin Permissions*.

Manage Access Tab

When you grant another user access to one of your flows, you both can work on the objects of the flow. You can take turns editing the recipes, which allows the team to more rapidly complete the work.

NOTE: When a user is given access to a flow, that user is considered a **collaborator** on the flow and has a smaller set of permissions than the **owner** of the flow.

NOTE: Any user may be given access to a flow. However, this user must have access to the underlying data. If the imported dataset is accessed from a private location, the user cannot access datasets in the shared flow.

Through this tab, you can invite one or more collaborators to the flow, so that you may work together on the same objects.

Share USDA Farmers Market 2014 Flow

Manage access

Invite the following users as collaborators:

SteveO

Who has access to USDA Farmers Market 2014 Flow:

Administrator

admin

owner

Figure: Manage Access Tab

- To add users as collaborators in your flow, start typing the name of a user with whom you'd like to collaborate. Select the user. Repeat this process to add multiple users.

NOTE: For privacy reasons, search may not be available in some environments.

- To add a group of users as collaborators, select an entry that includes **(Group)**. Any user in the group has the same permissions as if you shared the flow with the user directly.

NOTE: This feature is in Beta release.

NOTE: This feature must be enabled. For more information, see *Configure Users and Groups*.

To save your changes, click **Save**.

Each selected user now can access the flow through their flows page. See *Flows Page*.

NOTE: Collaborators have a reduced set of permissions on the flow. For example, they cannot edit the flow name or description or delete it. See *Overview of Sharing*.
