## Steps:

1. From Flow View, click the **Search** icon.
2. In the Search panel, enter a search term. As you type your search term, the search results are highlighted in yellow in the panel and in the flow canvas.
3. From the **Filter by type** drop-down, you can filter by flow object type:
  - a. Datasets
  - b. Recipes
  - c. Outputs
  - d. References

**NOTE:** If no object type is specified, then all object types are searched.

**Tip:** You may select one or more flow object types to search.

## Context menu

For each object displayed in the search results, its context menu displays the same options that are available from the object in the canvas, including these additional options:

- **View details:** Open the context panel showing the details of the object.
- **Show in flow:** Center the viewport of Flow View on the object.

The context menu options vary for different types of objects for which you are searching. For more information:

- **Datasets:** See *View for Imported Datasets*.
  - This category includes reference datasets imported from other flows.
- **Recipes:** See *View for Recipes*.
- **Outputs:** See *View for Outputs*.
- **References:** This category covers reference datasets that are created from the recipes in your flow. See *View for Reference Datasets*.
