

# Macros Page

In the Macros page, you can review and manage the macros to which you have access.

A **macro** is a saved sequence of one or more recipe steps that can be reused in other recipes. Values in your macros can be parameterized. For more information, see *Overview of Macros*.

Name	Used in	Last Updated
InitialCleanv3 Initial steps cleanup v3	1 Flow • 1 Recipe	Today at 5:36 PM
InitialCleanV2 Initial cleanup steps	0 Flows • 0 Recipes	Today at 5:34 PM
InitialClean Initial recipe cleanup steps	0 Flows • 0 Recipes	Today at 5:31 PM

**Figure: Macros Page**

To review specifics about the macro, click its name. See *Macro Details Page*.

## Columns:

- **Name:** Name of the macro.
- **Used in:** Count of flows and recipes in which the macro is used.
- **Last Updated:** Timestamp for when the macro was last modified.

## Actions:

- **Import Macro:** Click to import a macro that has been exported to your local desktop. For more information, see *Import Macro*.
- **Get Macros:** Explore and download macros from Wrangle Exchange.
- **Search:** Enter a string in the search box. The list of macros is updated in real-time.
- **Sort:** Click the caret next to any column head to sort the list based on the column.
- **Context Menu:** See below.

## Context Menu Options:

- **Edit:** Modify the name and description for the macro. You can also modify the name, description, and default values for the macro's inputs.
- **Inspect:** Review the recipe steps in the macro.
- **Export:** Export the macro to your local desktop. For more information, see *Export Macro*.
- **Replace:** Replace an existing macro definition with a macro that you have exported to your local desktop. For more information, see *Export Macro*.

**NOTE:** If your imported macro contains macro inputs that are not in the macro that you are replacing, the existing instances of the replaced macro contain a broken step where the macro is referenced but has no data. These references must be fixed in each macro instance. For more information, see *Macro Details Page*.

**Tip:** If you must add more macro inputs or steps to a macro that you have imported, you must convert the macro to steps, modify them, and then perform a replacement. For more information, see *Create or Replace Macro*.

- **Delete:** Delete the macro.

**NOTE:** When a macro is deleted, in any recipe that references it, the macro's steps are expanded into regular recipe steps. Any macro inputs are applied as static values in the expanded recipe steps.

**Deleting a macro cannot be undone.**
