

Create Flow Page

You can use flows to organize your datasets and to track the jobs associated with them.

- A **flow** is a container for datasets, recipes, and related objects.
- To create a new flow click **Create Flow** in the *Flows Page*.

Tip: You can also create a flow while importing datasets. See *Import Data Page*.

Steps:

1. In the Create Flow page, provide a Flow Name and optional Description.
 - a. **Flow Name:** The name of your flow appears in the Flows page.

NOTE: A flow name does not have to be unique. Use care in choosing your names.

- b. **Description:** Add a longer text description for your flow. This description appears in the Flows and Flow Details pages.
 - c. To create the flow, click **Create**.
2. From the Flow View page, you can add datasets to your flow, or import new ones. You may add multiple datasets at this time and add more later.
 - a. **Add dataset:** You can browse or search for datasets to add to your flow from the available ones.
 - i. This list includes all imported and reference datasets to which you have access.
 - ii. Select a different search filter to display all, imported, or reference datasets.
 - iii. To add a selected dataset, click the checkbox next to it.
 - b. **Import Datasets:** Click this link to import a new dataset into the application. After it is imported, it is automatically added to your flow. See *Import Data Page*.
 3. When finished, click **Add**.
 4. The datasets are displayed in the flow. For more information, see *Flow View Page*.
