

EXAMPLE - String Cleanup Functions

The following example demonstrates functions that can be used to clean up strings. These functions include the following:

- TRIM - remove leading and trailing whitespace. See *TRIM Function*.
- REMOVEWHITESPACE - remove leading and trailing whitespace and all whitespace in between. See *REMOVEWHITESPACE Function*.
- REMOVESYMBOLS - remove all characters that are not alpha-numeric or whitespace. See *REMOVESYMBOLS Function*.

Source:

In the following (space) and (tab) indicate space keys and tabs, respectively. Carriage return and newline characters are also supported by whitespace functions.

Strings	source
String01	this source(space)(space)
String02	(tab)(tab)this source
String03	(tab)(tab)this source(space)(space)
String04	this source's?
String05	Why, you @\$%^&*(!)
String06	this sörce
String07	(space)this sörce
String08	à mañana

Transform:

The following transforms generate new columns using each of the string cleanup functions:

```
derive type:single value: TRIM(source) as: 'trim_source'
```

```
derive type:single value: REMOVEWHITESPACE(source) as: 'removewhitespace_source'
```

```
derive type:single value: REMOVESYMBOLS(source) as: 'removesymbols_source'
```

Results:

Strings	source	removesymbols_source	removewhitespace_source	trim_source
String01	this source(space)(space)	this source(space)(space)	thissource	this source
String02	(tab)(tab)this source	(tab)(tab)this source	thissource	this source
String03	(tab)(tab)this source(space)(space)	(tab)(tab)this source(space)(space)	thissource	this source
String04	this source's?	this sources	thissource's?	this source's?
String05	"Why, you @\$%^&*(!)"	Why you	Why,you@\$%^&*(!)	Why, you @\$%^&*(!)
String06	this sörce	this sörce	thissörce	this sörce
String07	(space)this sörce	(space)this sörce	thissörce	this sörce
String08	à mañana	à mañana	àmañana	à mañana
