

# Create Role Dialog

To create a new role that you can assign to users, click **Create role** in the Roles page.

The screenshot shows a 'Create role' dialog box. At the top, the title 'Create role' is centered, with a close button (X) on the right. Below the title bar, there is a 'Name' label followed by a text input field containing 'viewer\_flows'. Underneath is the 'Privileges' section, which consists of three rows, each with an icon, a label, and a dropdown menu. The first row has a flow icon, the label 'Flows', and a dropdown menu with 'Viewer' selected. The second row has a database icon, the label 'Connections', and a dropdown menu with 'None' selected. The third row has a plan icon, the label 'Plans', and a dropdown menu with 'None' selected. At the bottom right of the dialog, there are two buttons: 'Cancel' and 'Save'.

**Figure: Create Role Dialog**

In this dialog, you assign one or more privileges to the defined role.

**Name:** Enter a name for your role. This name must be unique within the roles in the current project or workspace.

**Privileges:**

**Tip:** You can create a role with no privileges, which may be useful for disabling access to objects without disabling the account itself.

- **Flows:** These privileges govern the actions that users can perform on flows.
- **Connections:** These privileges govern the actions that users can perform on connections.
- **Plans:** These privileges govern the actions that users can perform on plans.
- For more information, see *Privileges and Roles Reference*.

To finish creating your role, click **Save**.

This role is now available for assigning to users. See *Roles Page*.
