

API Connections Permissions Create User v4

This is the latest version of the APIs.

Contents:

- *Required Permissions*
- *Request*
- *Response*

Share a connection with a specified user.

For more information on connections, see *Connection Types*.

Version: v4

Required Permissions

The authenticated user must be the owner of the connection.

NOTE: Each request to the Trifacta® platform must include authentication credentials. See *API Authentication*.

Request

Request Type: POST

Endpoint:

```
/v4/connections/<cid>/permissions/
```

Parameter	Description
<cid>	Internal identifier of the connection.

Request URI - Example:

```
/v4/connections/10/permissions/
```
