

HDFS Browser

The HDFS browser enables you to browse, select, and filter the files to which you have access in the Hadoop cluster to which Trifacta® Self-Managed Enterprise Edition is connected.

The HDFS browser appears when you create a dataset in HDFS or in the HDFS tab when you import a dataset. See *Import Data Page*.

NOTE: Interactions with HDFS are determined by user permissions and features enabled in the Trifacta platform. For more information, see *Using HDFS*.

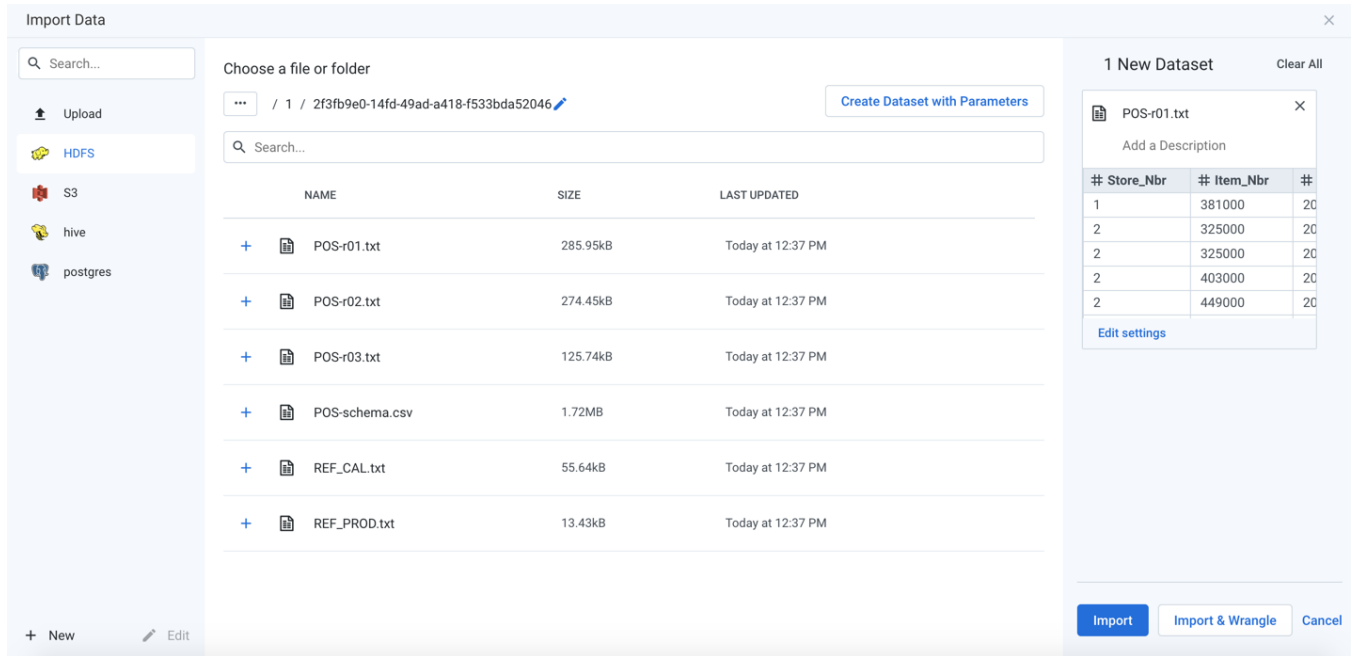

Figure: HDFS Browser

Browse HDFS:

Use the links and icons to browse for files and folders in the HDFS tree structure.

NOTE: Avoid using the Back button on your browser, which exits the HDFS browser without applying changes to your configuration.

Identifier	Type	Description
	Folder	<ul style="list-style-type: none"> Click the Plus icon to select all readable files in this folder. Click the text link to open the folder and browse further. <div style="border: 1px solid #ccc; padding: 5px; margin-top: 10px;"> <p>Tip: When you open a new folder, a reference to it is added to the Path value. You can modify the path value manually, which may be a faster way to navigate up a deep directory structure.</p> </div> <div style="border: 1px solid #ccc; padding: 5px; margin-top: 10px;"> <p>Tip: Sizes are displayed next to files. They are not displayed next to folders.</p> </div>

File

Click the Plus icon to select this file.

Specify HDFS Path:

In the HDFS browser, you can specify an explicit path to resources. Click the Pencil icon, paste the path value, and click **Go**.

```
/trifacta/input/username@example.com
```

You should paste the following in the Path textbox:

```
HDFS/trifacta/input/username@example.com
```

Tip: You can retrieve your home directory from your profile. See *Storage Config Page*.

Filter Files:

To display a subset of files, enter a string in the Search box. The filter is applied as you type and matches anywhere in the name of a currently displayed file or folder.
