- [Trial Editions](#)

Trifacta® is available to customers in the following editions.

For more specific limitations on each product edition, see [Product Limitations](#).

Locating Your Edition

In the Trifacta application, select **Help menu > About**.

Version:

This value is the build number.

Tip: When reaching out to [Trifacta Support](#), it can be helpful to provide the Version information.

Edition:

If the Edition value is present, it can be mapped to the following production edition:

Edition	Product Name
Enterprise	Trifacta Enterprise Edition
Professional	Trifacta Professional Edition
Starter	Trifacta Starter Edition
Trifacta Premium	Trifacta Premium
Wrangler Free	Trifacta Wrangler

Trifacta Edition Information

Product Tier	Description
Trifacta Enterprise Edition	Hosted by Trifacta on AWS, this product edition offers enterprise-grade features and support.
Trifacta Professional Edition	Hosted by Trifacta on AWS, this product edition enables broad connectivity and access to advanced APIs to integrate with your existing data pipelines.
Trifacta Starter Edition	Hosted by Trifacta on AWS, this product edition enables you to get started wrangling your data from cloud-based storage.
Trifacta Premium	Hosted by Trifacta on AWS, this product edition offers the broadest suite of capabilities, connectivity, and API access.

Product documentation for all of these product editions is now hosted in the following location:

<https://docs.trifacta.com/display/AWS>

Product documentation applies to all product editions. Documentation that is applicable to a subset of these product editions is marked like the following example:

Feature Availability: This feature is available in Trifacta Premium only.

Trial Editions

Thirty-day trials use Trifacta Professional Edition.

If you are using a 30-day trial edition of the product, you must upgrade to a licensed edition after the trial expires.

After your trial expires:

- All jobs and scheduled jobs are canceled.
- You can login to the Trifacta application, but you cannot access to your flows, recipes, datasets, and other objects that you have created within the product.
- You cannot access the APIs.
