

API JobGroups Get Publications v4

This is the latest version of the APIs.

Contents:

- *Required Permissions*
- *Request*
- *Response*
- *Reference*

Get list of publications for the specified jobGroup. A **publication** is an export of job results from the platform after they have been initially generated.

- For more information on publications, see *API Publications Get v4*.
- For more information on jobGroups, see *API JobGroups Get v4*.

Version: v4

Required Permissions

NOTE: Each request to the Trifacta® platform must include authentication credentials. See <https://api.trifacta.com/ee/6.4/index.html#section/Authentication>.

Request

Request Type: GET

Endpoint:

```
/v4/jobGroups/<id>/publications
```

where:

Parameter	Description
<id>	Internal identifier for the job group

Request URI - Example:

```
/v4/jobGroups/22/publications
```

Request Body:

Empty.

Response

Response Status Code - Success: 200 - OK

Response Body Example:

The following example publication is for an export to a Hive table.

```
{
  "data": [
    {
      "path": [
        "default"
      ],
      "id": 6,
