

# S3 Browser

In Trifacta®, the S3 browser lets you browse, select, and filter the sources that you can access through S3. You also use the browser to select targets for publishing job results.

**NOTE:** Interactions with S3 are determined by user permissions and features enabled in Trifacta. For more information, see *Using S3*.

**Figure: S3 Browser**

## Browse S3:

Use the links and icons to browse buckets for files and folders in the S3 tree structure.

**NOTE:** Permission to browse your buckets is determined by the permissions associated with your S3 credentials. If you do not have the appropriate permissions, you may not be able to browse the bucket. However, you may be able to paste in the full path to your location to gain access.

**Tip:** If S3 is the base storage layer, then the path to your output home directory should be available through the S3 browser. For more information on this path, see *Storage Config Page*.

- The Last Updated column contains information only for files. It is not available for directories.

**NOTE:** Avoid using the Back button on your browser, which exits the S3 browser without applying changes to your configuration.

Identifier	Type	Description
------------	------	-------------

	Bucket	<p>Indicates an S3 bucket.</p> <div data-bbox="362 184 1455 268" style="border: 1px solid #ccc; padding: 5px; margin-top: 10px;"> <p><b>NOTE:</b> You cannot add an entire S3 bucket as a source of data for your datasets.</p> </div>
	Folder	<ul style="list-style-type: none"> <li>Click the Plus icon to select all readable files in this folder.</li> <li>Click the text link to open the folder and browse further. You must have the appropriate permissions in your S3 account.</li> </ul> <div data-bbox="406 430 1455 520" style="border: 1px solid #c8e6c9; padding: 5px; margin-top: 10px;"> <p><b>Tip:</b> When you open a new folder, a reference to it is added to the Path value. You can modify the path value manually, which may be a faster way to navigate up a deep directory structure.</p> </div> <div data-bbox="406 546 1455 625" style="border: 1px solid #c8e6c9; padding: 5px; margin-top: 10px;"> <p><b>Tip:</b> Sizes are displayed next to files. They are not displayed next to folders.</p> </div>
	File	<p>Click the Plus icon to select this file.</p>

### Specify S3 Path:

In the S3 browser, you can specify an explicit path to resources. Click the Pencil icon, paste the path value, and click **Go**.

For example, if your home input directory is the following:

```
/mydir/input/username@example.com
```

You should paste the following in the Path textbox:

```
<bucketname>/mydir/input/username@example.com
```

**NOTE:** The name of the bucket (<bucketname>) must appear at the beginning of the path. Do not add a backslash (/) as a prefix.

**Tip:** You can retrieve your home directory from your profile. See *Storage Config Page*.

### Search Files:

To display a subset of files, enter a string in the Search box. The filter is applied as you type and matches anywhere in the name of a currently displayed file or folder.

**NOTE:** If you have a folder and file with the same name in S3, search only retrieves the file. You can still navigate to locate the folder.
