

EXAMPLE - DATEIF Functions

This example illustrates how you can apply conditionals to calculate minimum, maximum, and most common date values:

- **MINDATEIF** - Minimum of a set of Datetime values by group that meet a specified condition. See *MINDATEIF Function*.
- **MAXDATEIF** - Maximum of a set of Datetime values by group that meet a specified condition. See *MAXDATEIF Function*.
- **MODEDATEIF** - Most common Datetime value by group that meet a specified condition. See *MODEDATEIF Function*.

Source:

Here is some example transaction data:

Date	Product	Units	UnitCost	OrderValue
3/28/2020	ProductA	4	10.00	40.00
3/8/2020	ProductB	4	20.00	80.00
3/12/2020	ProductC	2	30.00	60.00
3/23/2020	ProductA	1	10.00	10.00
3/20/2020	ProductB	2	20.00	40.00
3/12/2020	ProductC	9	30.00	270.00
3/28/2020	ProductA	5	10.00	50.00
3/23/2020	ProductB	8	20.00	160.00
3/16/2020	ProductC	9	30.00	270.00
3/8/2020	ProductA	5	10.00	50.00
3/10/2020	ProductB	3	20.00	60.00
3/13/2020	ProductC	1	30.00	30.00
3/12/2020	ProductA	7	10.00	70.00
3/10/2020	ProductB	7	20.00	140.00
3/24/2020	ProductC	9	30.00	270.00
3/15/2020	ProductA	8	10.00	80.00
3/10/2020	ProductB	5	20.00	100.00
3/10/2020	ProductC	4	30.00	120.00

Transformation and Results:

These functions are useful for asking questions about your data. In the following, you can review specific questions and see the results immediately.

Question 1: What is the earliest date when a \$100.00 transaction occurred?

Transformation Name	New formula
Parameter: Formula type	Single row formula
Parameter: Formula	<code>mindateif(Date, OrderValue > 100)</code>

Parameter: New column name	'Answers'
-----------------------------------	-----------

Results: Value in Answers column: 3/10/2020

Question 2: What is the latest date when a \$200.00 transaction occurred?

Transformation Name	New formula
Parameter: Formula type	Single row formula
Parameter: Formula	maxdateif(Date, OrderValue > 200)
Parameter: New column name	'Answer'

Results: Value in Answers column: 3/24/2020

Question 3: On what date did the most transactions occur this month?

Transformation Name	New formula
Parameter: Formula type	Single row formula
Parameter: Formula	moderateif(Date, OrderValue > 0)
Parameter: New column name	'Answer'

Results: Value in Answers column: 3/10/2020
