- *Other Requirements*
  - *Desktop system requirements*

---

These requirements apply to Trifacta®, which interacts with the platform through the browser. Access to the platform requires one of the supported browser versions listed below.

**NOTE:** Parts of the application may become hidden or distorted unless zoom level is set to 100%.

**NOTE:** In some cases, ad blocking extensions in your browser, such as AdBlock, can interfere with features of the product. If you are experiencing issues with some Trifacta features, you may need to disable any ad blockers.

## Google Chrome Requirements

### Browser versions

**Version:** Google Chrome v.87-v.89, and any stable version that is released prior to the next release of Trifacta.

**NOTE:** Stable browser versions released after a given release of Trifacta will **NOT** be supported for any prior version of Trifacta. A best effort will be made to support newer versions released during the support lifecycle of the release.

**NOTE:** Mobile browsers and Google Chromebook are not supported.

### WebAssembly client extension

No other configuration is required.

#### Limitations:

In this release, the following limitations apply to use of WebAssembly:

- The current implementation of WebAssembly in this release is single-threaded, and performance may be impacted.
  - Google has not yet implemented multi-threaded WebAssembly.
  - When multi-threading is available, the Trifacta Photon client will feature multi-threading.

- Progress bars are not displayed for actions in the Transformer page. This is a known issue.

## Mozilla Firefox Requirements

**NOTE:** This feature is in Beta release.

### Browser versions

Mozilla Firefox v.84-v.86, and any stable version that is released prior to the next release of Trifacta.

**NOTE:** Stable browser versions released after a given release of Trifacta will **NOT** be supported for any prior version of Trifacta. A best effort will be made to support newer versions released during the support lifecycle of the release.

### Other Requirements

The following requirements also apply.

#### Desktop system requirements

- Intel Pentium 4 or AMD Opteron processor or newer (SSE2 or newer is required)
- 4 GB RAM

**Tip:** At least 8 GB RAM is recommended.

- 2 GB hard disk space
- 1280 x 720 screen resolution and above
- Internet connection (DSL or better)

**NOTE:** Trifacta® does not support connection through non-transparent or unauthenticated proxies. If you receive "Remote server timed out" error messages, you may need to re-connect through a network without a proxy.
