

Login

NOTE: Administrators of the platform should change the default password for the admin account. See *Change Admin Password* in the Admin Guide.

To login to the Trifacta® application, navigate to the following in your browser:

`http://<host_name>:<port_number>`

where:

- `<host_name>` is the host of the Trifacta application.
- `<port_number>` is the port number to use. Default is 3005.

If you do not have an account, click **Register**.

NOTE: If you enter a mismatched password and password confirmation, registration fails as expected. If you correct the mismatch and try to register again, registration may fail again. The workaround is to clear your browser cache and register again. This is a known issue.

- If self-registration is enabled, you may be able to immediately login after registering.
- If Kerberos or secure impersonation is enabled, an administrator must apply a Hadoop principal value to the account before you can login. Please contact your Trifacta administrator.
- System administrators can enable self-registration. See *Configure User Self-Registration* in the Configuration Guide.

After you login, you are placed in the Home page. See *Home Page* in the User Guide.

Tip: When you login for the first time, you can immediately import a dataset to begin transforming it.

- If you are using S3 as your base storage layer and per-user authentication has been enabled, you must provide the AWS credentials to connect to your storage. From the left navigation bar, select **User menu > Preferences > Storage** and then select the AWS option. See *Configure Your Access to S3* in the Configuration Guide.
- For a basic walkthrough of the Trifacta application, see *Workflow Basics* in the User Guide.

You cannot login to the application using an unsupported browser version. For more information on supported versions, see *Desktop Requirements*.

Product Documentation:

NOTE: After you log in the Trifacta application, you can access online documentation for your product. Select **Help menu > Documentation**.

To log out:

From the User menu, select **Log out**.
