

# Whitelist Platform Service

 **Feature Availability:** This feature may not be available in all product editions. For more information on available features, see *Compare Editions*.

Before you begin creating connections to your relational sources, you must whitelist the IP address range of the Dataprep by Trifacta Service in the relevant security groups.

**NOTE:** The database to which you are connecting must be available from the Dataprep by Trifacta Service over the public Internet.

The IP address range of the Dataprep by Trifacta Service is the following:

**NOTE:** On the database server for each relational source type (Oracle, SQL Server, etc.), you must whitelist these IP addresses.

## For Dataprep by Trifacta:

34.68.114.64/28
