

# Library Page

In the Library page, you can review your imported and reference datasets.

The screenshot shows the Library Page interface. On the left is a sidebar with navigation options: Library, All Objects (selected), Imported Datasets, and References. The main area is titled 'All Objects' and includes an 'Import Data' button and a search bar. Below this is a table with the following data:

## Filter by type:

Click one of the pre-defined filters to show datasets of the following types:

- **All Objects:** All imported datasets or references available to the current user.
- **Imported Datasets:** Datasets that you have imported into Designer Cloud powered by Trifacta® Enterprise Edition.
  - The Source column indicates where the original source data is located.
  - You can also access datasets that were imported through a configured connection. For more information, see *Connections Page*.
- **References:** Objects that you have created from your recipes that can be referenced in another flow as a dataset.

## Filter by ownership:

For the selected object type, you can filter based on the ownership of the object:

- **All:** All objects of the selected type to which you have access.
- **Owned by me:** All objects of the selected type that you own.
- **Shared with me:** All objects of the type that have been shared with you.

## Columns:

- **Name:** Name of the object.
