**API access is migrating to Enterprise only.** Beginning in Release 9.5, all new or renewed subscriptions have access to public API endpoints on the Enterprise product edition only. Existing customers on non-Enterprise editions will retain access their available endpoints (Legacy) until their subscription expires. To use API endpoints after renewal, you must upgrade to the Enterprise product edition or use a reduced set of endpoints (Current). For more information on differences between product editions in the new model, please visit *Pricing and Packaging*.

The following endpoints are available for Dataprep by Trifacta Starter Edition.

To access the reference documentation for each available API endpoint and method, select **Resources menu > API documentation** in the Dataprep by Trifacta application.

## Current

For Dataprep by Trifacta Starter Edition workspaces created after Release 9.5, the following endpoints are available.

### Flow

Path	Description	Documentation URL
